Becoming a Meaningful User

- What is Meaningful Use?
- How eCW meets the objectives of Meaningful Use to:
  - Improve quality, safety, efficiency, and reduce health disparities
  - Engage patients and families
  - Improve care coordination
  - Improve population and public health
  - Ensure adequate privacy and security protections for personal health information
- Where can I get more information?
Course Overview

Prerequisite: Basic understanding of eCW EMR (electronic medical records) and PM (practice management) functionality, obtained through on-site training or webinar attendance. This an advanced session presuming basic knowledge of eClinicalWorks product as used in your office on a daily basis.

Goals of training: To familiarize practices with the definition of Meaningful Use and demonstrate best practices for how to work toward this goal.

Intended audience: Office Administrators, Super-Users, and Clinical Staff and Providers

Intended timeline: Any time once basic software functionality is understood.
